

SPIROPLUS® PROTECTOR AEROSOL

Corrosion inhibitor

Excellent corrosion inhibiting effect.

Prevents corrosion of all common metals, including aluminium.

Prevents the formation of corrosion sludge in the system.

Reduces limescale formation in heat exchangers.

Ensures system efficiency is maintained and saves energy.

Extends the service life of the system.

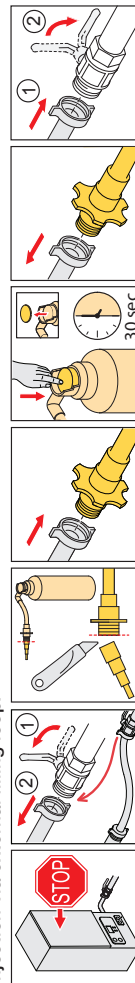

Can be used with all metals, seals and O-rings.

Pressurised container: may burst if heated

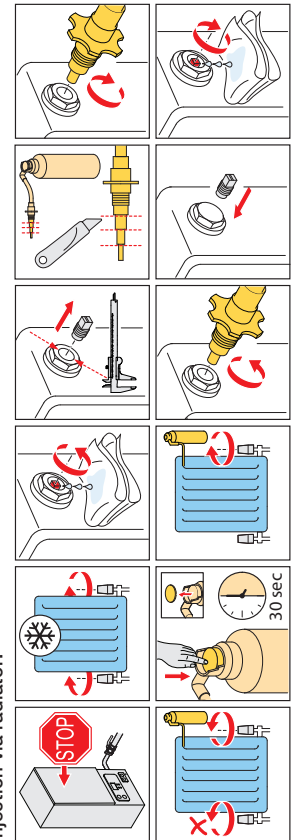

295 ml / 10 fl.oz. e

Injection via external filling loop:

Injection via radiator:
